

# Contents

<b>1</b>	<b>Introduction</b>	<b>1</b>
<b>2</b>	<b>Basic Manifold Theory</b>	<b>3</b>
2.1	Concepts in Manifold Learning . . . . .	3
2.2	Formal Goal of Manifold Learning . . . . .	5
<b>3</b>	<b>Local Graph-Based Manifold Learning</b>	<b>6</b>
3.1	Principles of Local Graph-Based Manifold Learning . . . . .	6
3.2	Concepts in Operationalization . . . . .	9
3.2.1	Neighborhood Graphs . . . . .	9
3.2.2	Local Tangent Spaces . . . . .	10
3.2.3	Eigenanalysis . . . . .	11
3.3	Unsupervised Techniques . . . . .	12
3.3.1	Laplacian Eigenmaps . . . . .	12
3.3.2	Locally Linear Embedding (LLE) . . . . .	12
3.3.3	Hessian Locally Linear Embedding (H-LLE) . . . . .	12
<b>4</b>	<b>Semi-Supervised Locally Linear Embedding (SS-LLE)</b>	<b>12</b>
4.1	Employment of Prior Information . . . . .	12
4.2	SS-LLE Algorithm . . . . .	12
4.3	Strengths and Drawbacks of SS-LLE . . . . .	12
<b>5</b>	<b>Experiment Results</b>	<b>13</b>
5.1	Experimental Design . . . . .	13
5.1.1	Software Implementation . . . . .	13
5.1.2	Evaluation Framework . . . . .	13
5.2	Replication of Original Results on the Incomplete Tire . . . . .	13
5.2.1	Incomplete Tire Data . . . . .	13
5.2.2	Choice of Hyperparameter and Prior Point Configuration . . . . .	13
5.3	Application on XXX Data . . . . .	13
5.3.1	XXX Data . . . . .	13
5.3.2	Choice of Hyperparameter and Prior Point Configuration . . . . .	13
5.4	Results and Discussion . . . . .	13
<b>6</b>	<b>Conclusion</b>	<b>13</b>
<b>A</b>	<b>Appendix</b>	<b>V</b>
<b>B</b>	<b>Electronic Appendix</b>	<b>VI</b>
